

REMARKS

In response to the objection to the drawings the claims have been amended to remove identifiers because they could the identifiers could be confused with labels in the drawings. Figure 1 clearly shows a cooling level 17 for  $n=6$ , that is different from cooling levels 44 and 45 in figure 3b.

The above amendments to the claims broaden the claims so that the doctrine of equivalence applies to all the elements of all the claims.

In response to the restriction requirement, stating that claims 26-29 are drawn to an invention that is independent and distinct from claims 1-29, and that applicant has already constructively elected the inventions of claims 1-29 for prosecution in this application, and the withdrawal of claims 26-29 from consideration, applicant cancels claims 26-29.

The claims are definite and distinguished from the citations and Applicant respectfully requests a Notice of Allowance be issued.

The Commissioner is hereby authorized to credit any overpayment or charge any fee (except the issue fee) including fees for any required extension of time, to Account No. 14-1270.

Respectfully submitted,

By Michael E. Belk
